Sheet Music Holder

The alternative to clothes pegs holding sheet music in place - unobtrusive, virtually invisible and simple to use. This patented sheet music holder resulted from the schools' talent competition "Creative Minds 2011 and rdquo; and was awarded first prize by the jury. The holder consists of a base section with integrated magnets, which is secured under the sheet music rest. The two caps at the ends of the transparent rubber lace are plugged onto the ends of the opened-out sheet holder on the sheet music rest. Opened sheet music books, folders, etc. are held securely, unaffected by the wind. Music and text can be read through the transparent lace and the pages can still be turned. The sheet music holder is suitable for the music stands from König&Meyer's product groups Baseline and Topline. The small sheet music holder can be transported folded, while on the stand.

Product variant

11590-000-55 - black
